

THE DEVELOPMENT & ASSESSMENT OF AN INTEGRATED CURRICULUM MODEL

WORKSHOP SESSION

*Dr. Catherine C. Bareiss
Olivet Nazarene University
Kankakee, IL 60901
(815) 939-5366
cbareiss@olivet.edu*

This tutorial works on developing an integrated curriculum model and advancing through the levels of the curriculum assessment maturity model (CAMM) in the field of computer science. The integrated curriculum model combines the content axis, competency axis, and dimensions of learning. The CAMM takes the concepts of the capability/maturity model developed by the Software Engineering Institute and applies it to curriculum assessment. This tutorial will present the curriculum model and CAMM and help the participants improve their assessment and develop assessment strategies.
