

AN INTRODUCTION TO PERL

TUTORIAL PRESENTATION

Johnathan Scott Duff

Dawn Green

Patrick R. Michaud

Department of Computing and Mathematical Sciences

Texas A&M University-Corpus Christi

Corpus Christi, Texas 78412

This tutorial will introduce the basics of programming in Perl for those who are familiar with other procedural programming languages. We will cover the Perl basic data types (including hashes), control structures, and file processing. Participants will be led through the construction of a Perl program illustrating each of the above features. The tutorial will also overview other resources for continuing study of Perl.
